O'Reilly is a learning company that helps individuals, teams, and enterprises build skills to succeed in a world defined by technology-driven transformation.

O'Reilly Media - Technology and Business Training

The Internet of things (IoT) refers to the concept of extending Internet connectivity beyond conventional computing platforms such as personal computers and mobile devices, and into any range of traditionally "dumb" or non-internet-enabled physical devices and everyday objects. Embedded with electronics, Internet connectivity, and other forms of hardware (such as sensors), these devices can ...

The RISC Analysis db contains descriptions of Machines, Models and Feature Codes, along with PNs, FRUs and CCINs. The majority of MT, MD and FC descriptions are based upon our own study of these systems, and as such, do not contain many of the errors which seem to be more and more common with IBM's published materials.

Welcome to RISC Analysis

What We Do. CERT experts are a diverse group of researchers, software engineers, security analysts, and digital intelligence specialists working together to research security vulnerabilities in software products, contribute to long-term changes in networked systems, and develop cutting-edge information and training to improve the practice of cybersecurity.

1.1 Overview. Briefly, a boot loader is the first software program that runs when a computer starts. It is responsible for loading and transferring control to an operating system kernel software (such as Linux or GNU Mach). The kernel, in turn, initializes the rest of the operating system (e.g. a GNU system).
