Parenting a Child Who Has Experienced Trauma

If well-prepared preppers have the perfect bug out location, equipped with every survival supply possible, how will they get there if the electromagnetic pulse has destroyed the electronic-based engines in their vehicles?

The First 15 Things You Must Do Immediately After an EMP

Parenting or child rearing is the process of promoting and supporting the physical, emotional, social, and intellectual development of a child from infancy to adulthood. Parenting refers to the intricacies of raising a child and not exclusively to the biological relationship. The most common caretaker in parenting is the biological parent(s) of the child in question, although others may be an ...

The hypothalamus is a bit like a command center. This area of the brain communicates with the rest of the body through the autonomic nervous system, which controls such involuntary body functions as breathing, blood pressure, heartbeat, and the dilation or constriction of key blood vessels and small airways in the lungs called bronchioles.
