Documents | AEC (UK) CAD & BIM Standards Site

CAD Standards are a set of guidelines for the way Computer-aided drafting (CAD), or (CADD) Computer Aided Design and Drawing, drawings should appear, to improve productivity and interchange of CAD documents between different offices and CAD programs, especially in architecture and engineering.

CAD standards - Wikipedia

Building information modeling (BIM) is a process involving the generation and management of digital representations of physical and functional characteristics of places. Building information models (BIMs) are files (often but not always in proprietary formats and containing proprietary data) which can be extracted, exchanged or networked to support decision-making regarding a building or other ...

Building information modeling - Wikipedia

This session will review and consolidate how the international standard for BIM can realistically be implemented across the globe. Rebecca will discuss how the ISO will be used across the UK and other regions of the world.

Programme – BIM Show Live

Leveraging well-structured information results in enormous efficiencies in the construction industry. IFC is the only open and standard 3D object-oriented exchange format used in BIM software. BCF-based data exchange is particularly suited for

BIM for Architects - graphisoft.akamaized.net

Risk management in the AEC (Architecture, Engineering and Construction) industry is a global issue. Failure to adequately manage risks may not only lead to difficulties in meeting project objectives but also influence land-use planning and urban spatial design in the future growth of cities.

A review of risk management through BIM and BIM-related

This course introduces more advanced techniques and teaches you to be more proficient in your use of AutoCAD. AutoCAD is the world's leading computer based design tool and the course provides a thorough and complete understanding of its features and functions.

AutoCAD Training from Authorised Trainers - Man and Machine

The course covers how to plan construction projects, how to manage supply chains, how to keep people working together, and how to use Building Information Modelling (BIM) for a more efficient construction process.

Construction Project Management with BIM MSc

Building Information Modelling (BIM) is a digitalised technology under a collaborative working platform. Certain aspects of sustainability have been highlighted in recent BIM studies; however, no prior in-depth review has focused on BIM standards or guidelines and its uses for sustainability.

A mixed review of the adoption of Building Information

It is safe to say that the Trump presidency, thus far, has been a disappointment when it comes to infrastructure investment. Trump, the candidate, promised a \$1 trillion, 10-year program to address some of the massive needs of our transportation, water/wastewater and other infrastructure systems.

AECInsight

The most powerful detailing software for the timber construction industry. hsbcad is a collaborative (BIM) software where designers, project engineers, production and site teams help each other detail projects for the offsite construction industry.

BIMFix Blog: A Review - BIMForum LOD Specification-2015

Overview: Introduction: The construction and BIM (Building Information Modelling) sector is now mature enough to place judgment on the effectiveness of the AIA G202 TM LOD 500 (Level of Development) framework! LOD 500 is commonly becoming the final client BIM deliverable, and thus can be seen as the client's most important Level Of Development within the Model Element Progression Specification.
