Anatomy and Physiology. Chapter 1 - The Human Body Anatomy is the science relating to the structural organisation of living organisms. Physiology is the science relating to the operational functions of living organisms. The many parts and systems of the body are integrated and function co-operatively to provide a healthy living body via 6 hierarchy levels of structural organisation.

Fruit anatomy is the plant anatomy of the internal structure of fruit.. Fruits are the mature ovary or ovaries of one or more flowers.In fleshy fruits, the outer layer (which is often edible) is the pericarp, which is the tissue that develops from the ovary wall of the flower and surrounds the seeds.. But in some seemingly pericarp fruits, the edible portion is not derived from the ovary.

Fruit anatomy - Wikipedia

Neanderthal anatomy differed from modern humans in that they had a more robust build and distinctive morphological features, especially on the cranium, which gradually accumulated more derived aspects, particularly in certain isolated geographic regions.. Anatomical evidence suggests they were much stronger than modern humans while they were slightly shorter than the average human, based on 45 ...

In his Christmas Lecture at the Royal Institution of Great Britain on 27 December 1873, the physicist John Tyndall (1820-1893) enraptured his audience members with demonstrations of the wonder of sound. The London Daily News chronicled Tyndall's appeal to his listeners—mostly children and their parents—with his acoustical tricks, which ranged from “magic wands”—rods he made to ...
