

ARCOS ONE PIECE FEMORAL REVISION SYSTEM ZIMMER BIOMET

### **arcos one piece femoral pdf**

Using the Arcos One-piece Femoral Revision System templates, determine the height of the femoral neck resection above the lesser trochanter and the height of the tip of the greater trochanter relative to the shoulder of the femoral component (Figure 4).

### **Arcos One-piece Femoral Revision System - Zimmer Biomet**

The Arcos One-piece Femoral Revision System is a comprehensive, press-fit stem for reconstruction of various defects. The system is used with Biomet Type I Taper modular heads, compatible acetabular shells, liners and screws.

### **Arcos One-piece Femoral Revision System - Zimmer Biomet**

One-piece and modular femoral stems have been used for the past twenty years to address femoral revision cases. However, modular implants provide surgeons the flexibility to adjust leg length and apply the necessary anteversion or retroversion to address stability.

The Arcos One-piece Femoral Revision System is a monolithic variant of the Modular Femoral Revision System (Arcos) (K090757). Like the modular system, the Arcos One-piece is designed as a porous-coated femoral stem available in multiple lengths and proximal bodies for primary and revision procedures.
