Torque Analysis using the BOLTCALC Program - Bolt Science

dane, Just curious about something I learned – one design called for 1 1/2" Gr 8 bolt with 2200 ft-lb tightening torque. now the engineer claimed that by specifying a 1000 ft-lb tightening torque will be adequate based his calculation. my comment to him was that then don't use 1 1/2" size bolt and go to a 7/8" or whatever, so that I can save some money. the other aspect of the bolt ...

Tension vs. Torque - Portland Bolt

A screw is a type of fastener, in some ways similar to a bolt (see Differentiation between bolt and screw below), typically made of metal, and characterized by a helical ridge, known as a male thread (external thread). Screws are used to fasten materials by digging in and wedging into a material when turned, while the thread cuts grooves in the fastened material that may help pull fastened ...

ASTM F3125/F3125M is a structural bolt specification covering inch and metric bolt grades. This specification contains 4 inch series bolting grades: A325, F1852, A490, and F2280.

Structural Bolts | Fastenal

Within industry, piping is a system of pipes used to convey fluids (liquids and gases) from one location to another. The engineering discipline of piping design studies the efficient transport of fluid. Industrial process piping (and accompanying in-line components) can be manufactured from wood, fiberglass, glass, steel, aluminum, plastic, copper, and concrete.

The Jergens Swivel Eyebolt lifting product has a full swivel and pivoting action which allows for the flipping and turning of the part without unhooking. The patented tamper resistant design is ideal for permanent mounting on OEM applications or on molds, dies and fixtures.

Swivel Eyebolt | Jergens Inc

The following illustration demonstrates the pitch diameter allowances on a 3/4-10 bolt and nut. The axial distance through which the fully formed threads of both the nut and bolt are in contact is called the length of thread engagement. The depth of thread engagement is the distance the threads overlap in a radial direction.

Screw Thread Design | Fastenal

Reduced In-Place Cost!! TAPTITE II ® and DUO-TAPTITE thread rolling screws reduce in-place fastener costs and provide vibration resistant assemblies. TAPTITE II ® and DUO-TAPTITE thread rolling screws are used to create strong, uniform load carrying internal threads into untapped nut members upon installation.
