3D scanning is the process of analyzing a real-world object or environment to collect data on its shape and possibly its appearance (e.g. colour). The collected data can then be used to construct digital 3D models.. A 3D scanner can be based on many different technologies, each with its own limitations, advantages and costs. Many limitations in the kind of objects that can be digitised are ...

Day after day, we get calls from people who have a Cad motor but are unable to tell what year/model they're looking at. Since many Cadillac 472 and 500 engines use the same block, and the later (425 and 368) engines look similar, as well, you'll have often to have a look deeper than the block casting numbers to finally determine which species of torque animal you have there.
