

COLOR AND LIGHT A GUIDE FOR THE REALIST PAINTER JAMES GURNEY

## **color and light a pdf**

Color (American English), or colour (Commonwealth English), is the characteristic of human visual perception described through color categories, with names such as red, orange, yellow, green, blue, or purple. This perception of color derives from the stimulation of cone cells in the human eye by electromagnetic radiation in the visible spectrum. Color categories and physical specifications of ...

Purpose. To introduce the roles of the eye and brain in the perception of objects, including color. Context. Many middle-school students do not think of light as something that travels from one place to another, and most tend to identify light with its source (e.g., light is in the bulb) or its effects (e.g., a patch of light).
