In engineering, a truss is a structure that "consists of two-force members only, where the members are organized so that the assemblage as a whole behaves as a single object". A "two-force member" is a structural component where force is applied to only two points. Although this rigorous definition allows the members to have any shape connected in any stable configuration, trusses typically ...

The second moment of area for an arbitrary shape R with respect to an arbitrary axis  $\bar{x}$  is defined as  $I_{\bar{x}} = \int_R y^2 dA$  where  $y$  is the differential area of the arbitrary shape, and  $\bar{x}$  is the distance from the axis  $\bar{x}$  to  $dA$ . For example, when the desired reference axis is
