Global warming is a long-term rise in the average temperature of the Earth's climate system, an aspect of climate change shown by temperature measurements and by multiple effects of the warming. The term commonly refers to the mainly human-caused observed warming since pre-industrial times and its projected continuation, though there were also much earlier periods of global warming.

## **Global warming - Wikipedia**

The global financial system is the worldwide framework of legal agreements, institutions, and both formal and informal economic actors that together facilitate international flows of financial capital for purposes of investment and trade financing. Since emerging in the late 19th century during the first modern wave of economic globalization, its evolution is marked by the establishment of ...

The performance of the Eurozone economy is inextricably linked to the health of its banking system. That means the economy will likely stagnate unless European banks can build robust balance sheets, earn a competitive return on equity, and generate adequate capital to support faster growth and innovation.
