

LAST DESIGNING AND MAKING

last designing and making pdf

Foreword by Richard Lochhead. I am proud to present "Making Things Last": Scotland's first circular economy strategy. In a world of finite resources, where global population and consumption growth are driving increased volatility and vulnerability in the supply of raw materials, the circular economy offers a new and exciting perspective.

Game design is the art of applying design and aesthetics to create a game for entertainment or for educational, exercise, or experimental purposes. Increasingly, elements and principles of game design are also applied to other interactions, particularly virtual ones (see gamification).. Game design creates goals, rules and challenges to define a board game, card game, dice game, casino game ...

IMAGE: Victoria Henshaw's Sheffield smell walk, mapped. Regular Edible Geography readers will know that smellscapes are a recurring subplot of this blog — a diversion that I justify on the basis that roughly ninety percent of what we perceive as taste is actually smell. For the most part, the built environment consists of accidental and overlooked odours — an unintentional backdrop of ...

Oracle acquired Sun Microsystems in 2010, and since that time Oracle's hardware and software engineers have worked side-by-side to build fully integrated systems and optimized solutions designed to achieve performance levels that are unmatched in the industry. Early examples include the Oracle Exadata Database Machine X2-8, and the first Oracle Exalogic Elastic Cloud, both introduced in late 2010.

Cement is one of the world's most-used building materials, with production reaching 4.3 billion tons/year in 2014 and growing 5 percent to 6 percent annually. Today, it is responsible for 5.6 percent of global carbon dioxide (CO₂) emissions and a major contributor to climate change — if the cement industry were a country, it would be the world's third-largest emitter.

Introduction. Agriculture in the 21st century is confronting immense challenges. It is estimated that by 2050, human population of the earth will reach 9.7 billion people (United Nations, Department of Economic and Social Affairs & Population Division, 2015). How and where we produce the food and energy to support this increasing population is a major question given that agriculture is already ...
