Office-based anesthesia - UpToDate

SUMMARY. BACKGROUND AND OBJECTIVES: This case report describes a rare and potentially fatal condition associated with anesthesia administration. Our aim was to discuss the causes of sudden cardiac arrest during the perioperative period in apparently healthy patients and the pathophysiology of anomalous origin of the coronary arteries as a cause of sudden cardiac arrest.

Sudden cardiac arrest in general anesthesia as the first

Xenon and the other noble gases were for a long time considered to be completely chemically inert and not able to form compounds. However, while teaching at the University of British Columbia, Neil Bartlett discovered that the gas platinum hexafluoride (PtF_6) was a powerful oxidizing agent that could oxidize oxygen gas (O_2) to form dioxygenyl hexafluoroplatinate (O_2^+).

In advanced airway management, rapid sequence induction (RSI) - also described as rapid sequence intubation or as rapid sequence induction and intubation (RSII) - is a special process for endotracheal intubation that is used where the patient is at a high risk of pulmonary aspiration or impending airway compromise. It differs from other forms of general anesthesia induction in that artificial ...
