

OIL ANALYSIS IN TRANSFORMER MAINTENANCE

### **oil analysis in transformer pdf**

A GUIDE TO TRANSFORMER OIL ANALYSIS BY I.A.R. GRAY Transformer Chemistry Services INTRODUCTION The fault free operation of power transformers is a factor of major economic importance and safety in power supply utilities and

### **A GUIDE TO TRANSFORMER OIL ANALYSIS BY I.A.R. GRAY**

Transformer oil, a type of insulating and cooling oil used in transformers and other electrical equipment, needs to be tested periodically to ensure that it is still fit for purpose. This is because it tends to deteriorate over time. Testing sequences and procedures are defined by various international standards, many of them set by ASTM. Testing consists of measuring breakdown voltage and ...

Transformer Repair, Rewind & Testing. Alfa Transformer offers complete repair and testing services for dry type and oil filled transformers up to 5000 KVA.

### **Alfa Transformer :: Transformer Repair, Dry Type**

Dissolved gas analysis (DGA) is the study of dissolved gases in transformer oil.. Insulating materials within transformers and electrical equipment break down to liberate gases within the unit. The distribution of these gases can be related to the type of electrical fault, and the rate of gas generation can indicate the severity of the fault.

About this Journal: International Journal of Engineering Research & Technology is a peer-reviewed, Open Access journal that publishes original research & review articles in all major branches of engineering. We have adopted a fully open access publishing model which allows open global access to its published content so anyone can download & read articles round the clock totally free of cost.

Anti-wear additives prevent direct metal-to-metal contact between the machine parts when the oil film is broken down. Use of anti-wear additives results in longer machine life due to higher wear and score resistance of the components.

## Additives in lubricating oils [SubsTech]

This applies to each transformer. 4. Calculate the Transmission-Line Reactance. Use the equation:  $X \text{ per unit} = (\text{ohms reactance})(\text{base kVA}) / (1000)(\text{base kV})^2$ ;  $X \text{ per unit} = (65)(25,000) / (1000)(72.1)^2 = 0.313 \text{ p.u.}$ ; 5. Calculate the Reactance of the Motors. Corrections need to be made in the nameplate ratings of both motors because of differences of ratings in kVA and kV as compared with those ...
