Inventory (American English) or stock (British English) is the goods and materials that a business holds for the ultimate goal of resale (or repair).. Inventory management is a discipline primarily about specifying the shape and placement of stocked goods. It is required at different locations within a facility or within many locations of a supply network to precede the regular and planned ...

Retail Loss Prevention is a set of practices employed by retail companies to preserve profit. Profit preservation is any business activity specifically designed to reduce preventable losses. A preventable loss is any business cost caused by deliberate or inadvertent human actions, colloquially known as "shrinkage". Deliberate human actions that cause loss to a retail company can be theft ...

Chance plays an important role in everyone's career, but career counseling is still perceived as a process designed to eliminate chance from career decision making.

Planned Happenstance: Constructing Unexpected Career

The paper explores the usefulness of analysing firms from the resource side rather than from the product side. In analogy to entry barriers and growth?share matrices, the concepts of resource position barrier and resource?product matrices are suggested.

Indecision and delays are the parents of failure. The site contains concepts and procedures widely used in business time-

dependent decision making such as time series analysis for forecasting and other predictive techniques

Time Series Analysis for Business Forecasting

There are three excellent reviews of supply chain contract analysis prepared by Cachon (2003), Lariviere (1998) and Tsay et al. (1998). These three reviews offer different perspectives in the following sense: Tsay et al. (1998) provide a qualitative overview of various types of contracts when the demand is deterministic and random; Lariviere (1998) shows quantitative analyses of different types ...
