Harmonic scalpel - Wikipedia

An exploratory laparotomy (also known as an ex-lap) is a surgical operation where the abdomen is opened and the abdominal organs examined for injury or disease. It is the standard of care in various blunt and penetrating trauma situations in which there may be multiple life-threatening injuries, and in many diagnostic situations in which the operation is undertaken in search of a unifying ...

En los Estados Unidos, el cáncer vesical suele originarse de las células que recubren la vejiga, denominadas células transicionales. Estos tumores se clasifican por la forma en que crecen: Tumores papilares que lucen como verrugas y están adheridos a un tallo. Tumores no papilares (sésiles) que ...

Svi ljudi bar jednom u životu dožive bol u trbuhu. Bol u trbuhu ima mnogo potencijalnih uzroka, ali u najvećem broju slučajeva uzroci nisu ozbiljni i mogu se lako dijagnosticirati i liječiti.

Bol u trbuhu — Vikipedija, slobodna enciklopedija

História. O conceito de toracotomia como medida ressuscitativa iniciou com Schiff, e sua promoção da massagem cardíaca aberta em 1874, o que foi seguido pela sugestão de Block em 1882, de que a toracotomia deveria ser aplicada no reparo de lacerações cardíacas. Duas décadas se passaram antes que Ludwig Rehn suturasse com sucesso uma ferida em ventrículo direito em um humano.
