Lower respiratory tract infection (LRTI), while often used as a synonym for pneumonia, can also be applied to other types of infection including lung abscess and acute bronchitis. Symptoms include shortness of breath, weakness, fever, coughing and fatigue.. There are a number of symptoms that are characteristic of lower respiratory tract infections. The two most common are bronchitis and edema.

Judgement of CIT(A) and Tribunal that assessee is an investor and not a trader on the basis of the following facts cannot be faulted: (a) assessee has been an investor in shares and has consistently treated its entire investment in shares as "investment in shares" & not "stock-in-trade";

CIT vs. Datta Mahendra Shah (Bombay High Court

Highlights A conceptual model of bio-behavioral synchrony is proposed for the study of human affiliation. Affiliation is expressed by unique physiology and behavior synchronized online among partners. OT supports the three prototypical social bonds in humans— parental, pair, and filial. Brain, genetic, and hormonal markers of OT interact with behavior to support

bonding across life.
